

NEARLY
FOOL-PROOF
INSTRUCTIONS
YOU CAN DO
IT!!!

1.

2.

WATCH AND LEARN.

Use the quick and simple **how-to video!**
Scan this with your smartphone's camera.

Or head to: tinkertrading.com/video

What! You don't want to watch the video? Okay you rebel, let's do this!

1. A - Slide those small bed posts into the base sheet and keep the **black tipped posts on opposite sides** of the sheet.

B - Insert the **black tips into the black holes** of the big post, make sure the remaining holes are facing up. *the big 'Tinker' posts must be kitty-corner to each-other.

2. Rotate the big post up and guide the remaining bed post into the hole, repeat for each big post.

3. Arrange the tops of the big posts as shown in fig. 3, it's super important! Make sure **the grooves face outwards!** Tightly wrap the rope around all the posts and within the grooves. Tie off the rope end to the wrapped section.

4. Drape over the canopy and fold over a collar about an inch. **Pull one hole through the other** and secure with the small pins. (Confuzzled? Don't forget about that video!)

5. HIGH FIVE, you did it! Now Insert your fuzzy friend! (or tell the Grumpy Lump they aren't allowed in and they'll make themselves at home in no time)
